Nasjonalt senter for
e-helseforskning

SAK TIL STYRINGSGRUPPEN

Faglig rapportering

Saksnummer	08-2025
Avsender	kst. senterleder
Møtedato	28.03.2025

Bakgrunn for saken

Vedleggene gir oversikt over publikasjonene i 2024, hittil i 2025 og publikasjonsstatistikk. NVI-rapporteringen for 2024 er ikke klar og tallene i statistikken kan derfor endres når rapporteringsfristen er utløpt. Det forventes ikke store avvik fra tallene som presenteres i statistikken når de endelige tallene foreligger 1. april (fra HK-dir).

Statistikken viser at senteret i 2024 hadde ca 54 NVI-godkjente publikasjoner. Dette er noe ned fra 2023 (58), men å forvente siden senteret i 2024 stod i en omstilling. Det forventes at tallene vil gå noe mer ned i 2025, som et resultat av lavere aktivitet i omstillingsperioden.

Tallene for open access oppdateres kontinuerlig når publikasjoner lastes opp i vitenarkiv eller blir åpent tilgjengelig via tidsskriftet. Statistikken gir kun et bilde av nå-situasjonen. Våren 2025 planlegges det for å lansere det nye nasjonale vitenarkivet (NVA) og det antas at publikasjoner med det vil bli raskere tilgjengelig for alle.

Forslag til vedtak

Styringsgruppen tar saken til orientering.
